
Broth No. 2 with 2% Glucose and Durham Tubes (GLUBP)

In vitro diagnostic medical aid.

Only for professional use.

Purpose: The product is designed to demonstrate glucose fermentation with the formation of gas by bacteria of the Enterobacteriaceae family.

Package contents: 10 ml solution in a test tube

Composition: Glucose, demineralized water

Storage: Store in a cool place at +2 to +8 °C.

Usability: Use within 24 hours after opening the primary packaging.

Procedure: Inoculate the clinical material aseptically in the growth medium.

Incubation: under optimal conditions – 24 hours at 35 °C.

Information for users: Do not use after the expiration date.

Dispose of used and unused products as hazardous waste in accordance with applicable regulations.

Instructions in case of a damaged packaging: In case of damage to the packaging, do not use and dispose of the product.

Quality control:

Type of inspection	Inoculated culture	Result
Positive check	<i>Escherichia coli</i> CCM3954	There is a gas bubble in the microtest tube
Negative check	<i>Shigella flexneri</i> CCM 4422	No gas bubble in the microtest tube
